Revision a9b7daa7 - 03/01/2017 10:38 AM - anonym

Tor Browser: don't show offline warning when opening local documentation.

Will-fix: #12269

Revision 00acdc47 - 03/01/2017 11:00 AM - anonym

Avoid full Tor bootstraps in two scenarios that can be offline.

IIRC the reason we plugged the network in these scenarios was to avoid
the "Tor is not ready" prompt, but (refs: #12269) is now fixed, so it
will not be shown.

Revision d21e11ae - 03/03/2017 08:49 AM - intrigeri

Merge remote-tracking branch 'origin/feature/12271-i2p-removal-notification' into stable (Fix-committed: #12271, #12269).

I want this fixed in Tails 2.11 (due to [#12271]() and [#12193]()) and have already implemented a fix in the feature branch. I won't look further into [#8061](), however, so I think it's best if we treat them separately.

Let's see what Jenkins thinks.
