### History

#### #1 - 11/06/2014 03:42 PM - intrigeri

- Status changed from New to Confirmed

#### #2 - 03/18/2016 01:59 PM - drzraf

- File testsuite.patch added

Far from perfect, but possible to build something from this (ignore the configure.in => configure.ac hunk, it's just a rename)

If later TESTDIR=/tmp/test has to be a VM/Vagrant/Docker, stuff can be adapted, but backups files will always use TESTDIR anyway and dotest.sh.in is just a simple bash script for now.
